Catina Ann Marsh vs. State of Arkansas

DR. Kenneth Dowless Dawless
DR. Linda Parker

Psychiatric Malpractice

County Prosecutor Margie Lickett

On October 16, 1998, Catina Ann Marsh, received a C-T Scan report of the brain to checking for a chemical imbalance. The C-T Scan report results showed normal computed Tomography of head and skull. The C-T Scan showed no chemical imbalance finding no mental health deterioration. As of June of 1991-October of 1998, there was no true mental illness based on C-T Scan exam for Persistent Psychosis.

This case assigned to District Judge Marshall
and to Magistrate Judge Vrepe

On January 21, 2011, Catina Ann Marsh, was wrongfully found incompetent by an unfair court proceeding. Attorney Dusty Byrnes, who did legal mal-practice, confirmed to me he wasn't going to attempt to defend, Catina Ann Marsh, the defendant. Am suing for 4.5 million for letting me be committed to continue to be abused verbally and physically by nursing staff.

On January 21, 2011, Catina Ann Marsh, was detained in a State facility by the County Magistrate Judge and Prosecutor Attorney Margie Lickett who argued that I should be after Dr. Linda Parker and Dr. Kenneth Dowless committed perjury under oath I was in fact truly incompetent according to my behavior.

All statements made in court on docket are not true according to my C-T Scan medical reports. I am suing each as mentioned on this paper 4.5 million for the verbal and physical abuse while on psychotic medicines that cause hallucinations. This can be proven by a second opinion licensed Psychiatrist.

Witness of MY Behavior

Re: Freedom of Information/Privacy Act Request No. 2012-02742
MARSH, Catina; Register Number 84585-080

Ms. Marsh:

The Bureau of Prisons medical record pertaining to you has been reviewed pursuant to your request. You requested a copy of your medical records specifically copies and results of the computed tomography scans, magnetic resonance imaging, and positron emission tomography scans generated during your incarceration at the Federal Medical Center, Carswell, in Fort Worth, Texas.

Staff determined the files you are requesting were destroyed in the ordinary course of business and according to national document retention policies. However, it has been determined one (1) page of medical records are relevant to your request and is being released to you. These confidential documents are being released at no cost to assist you.

Under Title 28, Code of Federal Regulations, Section 16.9, this decision may be appealed to the Attorney General within sixty (60) days of the date of this letter by writing to the Office of Information and Privacy, Department of Justice, 1425 New York Avenue, Suite 11050, Washington, DC 20530-0001. Please ensure that the envelope and request are clearly marked "FOIA Request Appeal."

We trust the information furnished will be of assistance to you.

Sincerely,

for Jason A. Sickler
Regional Counsel

DEPARTMENT OF RADIOLOGY
X-RAY REPORT

Name: MARSH, CATINA
Number: 84585-080 Referring Dr.: STANTON
Clinic: FEDERAL MEDICAL CENTER, CARSWELL Date: 10/16/98
J Street, Bldg. 3000
Fort Worth, Texas 76127

Exam: CT OF THE HEAD

REASON FOR EXAMINATION: Persistent psychosis.

Computed tomography of the head is performed prior to and following intravenous contrast enhancement. Sections extend from the skull vertex through the skull base. Postcontrast images include thin sections of the posterior fossa.

Prior to contrast, there is normal attenuation of the gray and white matter. Mass effect or shift of midline structures is not identified. Size and contour of the ventricular system is normal. There are no abnormal extra-axial fluid collections.

After the injection of contrast, normal physiologic enhancement is noted. Abnormal focal enhancement is not identified.

Osseous structures of the skull base and calvarium are intact. Visualized paranasal sinuses are clear.

IMPRESSIONS:

NORMAL COMPUTED TOMOGRAPHY OF THE HEAD PRIOR TO AND FOLLOWING INTRAVENOUS CONTRAST.
